KeyMacro is a small yet powerful application to create, manage and edit macros in Microsoft PowerPoint 2010/2013. Macros can save a lot of time when developing PowerPoint documents because they are considered as reusable tools. It is thus very convenient to have them included in your presentations. In order to use them, the presentations need to be unlocked and the macros need to be activated, as they are disabled by default. In KeyMacro you can easily modify the available macros and activate the ones you want. You can also create new ones. It is easy to set up the application so as to be able to edit your macros from the keyboard. At last, KeyMacro allows you to export/import your

macros and is totally portable. This means that you can move the created macros to a USB stick and use them on your other computers. It is easy to install the latest version and it supports the Windows 7/8, Windows 10 and Windows Server 2016 operating systems.
