Is there a way to inspect the content of the Message that has been published in a "subscribers" table, by a particular Instance? I would like to be able to loop through the Table and see which Instance is sending Messages with a particular content to the subscribers. I would like to see some sample code, using the MSDN example A: I'm not sure exactly what you're trying to accomplish, but if you want to do a side by side comparison (presumably of a message sent to the subscriber, and a message published on a bus) you can use the "Evaluate" action. This action will evaluate the message with the Message Inspector. You can see in the "Get Methods" section of the Message Inspector that the evaluation action uses the Message Inspector package to evaluate the message. You can also utilize the Message Inspector to
