Even if only a small fraction of people still use the fourth-generation Lightroom (version 4), those who do, or, more likely, those who use the older versions of cataloging software that have been around for years (such as Aperture or Photosplus), will derive tremendous value from Lightroom changes in Lightroom's 5th version. While there may be some features that the newcomer could enjoy, users such as this will see it right away. In my opinion, if Lightroom 6 comes out, Lightroom 5's developers will be overhauling existing features rather than focusing on new ones. The fact is that Lightroom 5 has improved in a multitude of ways. It's kind of like getting some years worth of work done in one year. But there are still plenty of improvements that could be made to it. One idea is to make small touches as a user transitions to the new model. A new editing card could ask if one wants to import all photos from the Camera card, for example. I love the iPad Pro. I've had a 6th gen 12-inch iPad for almost a year and I use it in Text, Sketch, Illustrator, and Lightroom on a daily basis. The powerful processor lets me perform every task in my favorite software without bogging down the whole thing. I've been using Photos on the iOS for a few months now and it's becoming one of my favorite apps on the iPad. Although it works best on the iPhone 6s and the iPad Pro with the iPad Pencil, you can still use Photos with the included Pencil. It's one of the better apps on the iPad if you need to take handwritten notes and have long lists of to-do and project notes.

Photoshop is made for people who thrive on the blending of art and technology. But when you lose your footing in an artistic project, the first step towards recovery is to look down and recognize that you're lost. It's time to ask for help. It's hard not to feel overwhelmed when you're staring at an 8 hour deadline, but imagining the success you'll eventually achieve if you follow a path steeped in confidence will help you to stay focused. If you work with strangers too often, it is better to find a mentor. Take advantage of the growing community to help you with the design process. Every little bit of dialogue about art will help you craft a masterpiece. Also, keep in mind that some of the features are free and some are paid. Most of the features are found in a paid subscription. If you're looking for cheaper options, keep in mind that some of the best free photo editing apps can do the trick. Annax Jessie

Nowadays, everyone is using a smartphone. The companies have already commenced the transition from storing and capturing the images on the smartphone to an external storage apparatus. Adobe Photoshop is one of the best applications that can be used to edit the smartphone picture. You can try using the following features:

- You can save your images or photos as well to have access to them afterwards
- You can apply filters to the image
- You can download and view the original images

Photoshop's canvas operates as an undoable 2D image, which means the tool can be used to freely edit areas of an image, such as moving objects or fixing particular fonts in a document. Get to work on your editing projects as fast as possible! Adobe Photoshop Version 15.0 contains a couple of features that further enhance its capability and proficiency. The most used effects are generally available to be applied while editing. While in the process of applying the effects, the user is prompted to change the layers. The function is available when adding layers in Photoshop. Any changes made to the layer(s) as already applied in the original picture always has to be applied. This

might become tedious but it is not an issue. Alejandro Lozano, Adobe's vice president of Creative Cloud, said, "Our goal with Photoshop Creative Cloud is to put Photoshop in the hands of anyone with a smartphone camera. With Photoshop 15 in Creative Cloud, anyone can turn ordinary images into extraordinary art. A new Photoshop release containing more than 250 new features, will be available to download free of cost on July 19, 2014. It was earlier that Adobe acquired the company behind these features.
