In June this year, it was accused of trying to financially sabotage the grain export industry in Cuba so it can profit from the restrictions imposed by the Cuban government. In the last decade, the GPAE has been active in several legal proceedings. Most notably, it was accused of conspiring with Venezuelan oligarch Rafael Ramirez and an international cocaine cartel to undervalue grain shipments with the aim of undermining Venezuela's food security. It says something about "it can't find the required version of the PSD file" Now I can't open my old PSD file. I am getting really angry about this huge de-grading. I really want to upgrade to the latest product but I can't open my old documents. Very annoying.

In celebration of the upcoming 2028 software release, Adobe announced a new low price on Adobe Elements 20. That subscription-free program is enhanced with speedier editing performance and compatibility with new hardware platforms. The price is only \$99 for a personal license or \$249 for a family license, a 50% savings and a 50% price reduction from 2023. For more information, go to www.adobe.com/photoshop. Developers also announced an upgraded fully featured SDK (software development kit) for the Photoshop Web Content API. To create Web pages, sites, and applications that can leverage the power of the latest version of Photoshop, developers can now exploit the convenience and powerful tools provided by the new program. This includes the ability to manage layers, use content from Photoshop as an image resource, and edit images in a browser, all with the click of a button. With the Web Content API, developers can also leverage the power of Photoshop without having to build a full Photoshop application. This new framework provides full access to the PNG image format, the common image format used in web browsers and page renderers. Along with the new features for Elements announced today, Adobe also introduced significant updates and enhancements to the Photoshop desktop application. The biggest advancement for the 2019 release is the ability to edit images in a browser, without leaving Photoshop. Using the new web browser extension, the user will be able to edit images in a browser without requiring Photoshop desktop software. For example, they can turn an image into a vector, apply a filter, add a watermark or improve the exposure. All of these actions are then replicated back to the original location in the image.
